MARKET WATCH

As we watch the market crumble in these troubling times, it brings home the importance of having a means of income not bound by the market. The internet can provide you with an avenue for income that can't be matched in these times. Look around and find something those around you need and start providing it for them. Always be on the lookout for a better way to fill those needs. The big money comes to those who take action, not those who complain, "Someone ought to do this or that." Complainers usually end up broke.

Getting the most from your research and investments

Long before you are successful in your endeavors, you will fail many times. Each failure will bring you closer to success.

Through research, investment, and perseverance you will achieve the success you have always dreamed of. Even when your dreams change along the road to success you will find it has only changed because you found a path that made more sense. This is the way of life, the way that everyone must follow.

In the heart of each of us there is a means to reach the final goal. Too many times we allow others to dissuade us from our goals. It is too hard, you will only fail, why bother, it won't work. These are the words of those who see success as impossible. The only thing that is impossible is succeeding without ever trying. Each day I meet individuals who have dreams in their minds but no motivation in their hearts to drive them toward their

dreams of success. Who is the only person that can make you successful? It is you! Never blame anyone for your lack of success. You have to keep plowing ahead no matter the odds against you. Never let anyone tell you that you can't succeed. They have the failures and dearly love having you in the mud of failure also. They are not your friends. They are your stumbling blocks. Leave them behind. Build and follow your own dreams.

SMARTER INVESTING:

Invest in Yourself vs Others

Take the time to invest in yourself before you invest in others. In every job you have ever had, you were asked to study and improve yourself so you could do work that would bring them more for their investment in you. It is now time to do the same for yourself. Always strive to improve yourself with each passing day. It will pay off!
